PROFESSIONAL SUMMARY

I am a Flutter Software Developer passionate about crafting high-performance mobile applications with intuitive user interfaces. Proficient in Dart, Firebase, and Getx state management, and also have a solid foundation in Python and JavaScript.

Experienced in delivering end-to-end app development from concept through deployment and maintenance.

TECHNICAL SKILLS

Languages: Dart (Flutter), Python, JavaScript

Frameworks & Tools: Flutter, Getx, Firebase, Git.

Mobile: Android & iOS app development, REST APIs, Push Notifications

Other: UI/UX principles

EXPERIENCE

Flutter Developer | Freelance / Independent Projects | Jan 2023 – Present

- Designed and implemented Flow Chat, a Flutter-based real-time chat app with Firebase backend, featuring user authentication, multimedia messaging, and push notifications.
-
- Developed a comprehensive E-commerce app on Flutter, integrating secure payment processing, product browsing, user profiles, and order management.
- Optimized app performance and user experience, reducing load times and increasing responsiveness by 30%.
- Collaborated with designers and product owners to translate requirements into scalable, maintainable code.

EDUCATION

B.Sc. Computer Science

Godfrey Okoye University, Graduated 2024

PROJECTS

Flow Chat: Real-time multi-user chat app built with Flutter and Firebase.

E-commerce App: Mobile shopping platform with product catalog, payment integration, and order tracking.
